# ROTO-COMPACTOR

## The APS 800

- achieves maximum cost savings and significant reduction of effort and labour.
- positioning the unit directly where waste is generated saves handling costs.
- utilises manpower significantly as everybody can operate the unit without any training.
- can be fed whilst compacting the waste.
- helps to keep the working environment clean.
- eliminates expensive and space-consuming containers.
- minimum space requirements: needs less than 2m<sup>2</sup> of area and only 2.30 m of total height.
- can be moved through standard doorways.
- particularly suitable for wet waste and heavy use.
- improves hygiene by discouraging vermin and insects and minimising smells.

1. The Roto-Compactor grips, tears and compacts the waste by means of a specially designed steel drum.

2. The wheely bin is emptied by a dust car.

Dimensions

### Type: APS 800

#### Technical Specification

Own weight:	720 kg
Bin-Content:	600 l / 800 l
Electrical data:	2.2 kW/380-415 V/50 Hz

Beneficial application for waste disposal and recycling in many industries, including:

- **Food industry**
- **Restaurants**
- **Catering**
